

San_Diego_County_GRP_Analysis_2019_2023.pdf

The economic landscape of San Diego County from 2019 to 2023 reveals a compelling narrative of growth and change. Over this five-year period, the Gross Regional Product (GRP) of the county experienced a notable increase, rising from approximately \$244.28 billion in 2019 to \$308.71 billion in 2023. This growth, amounting to an increase of about \$64.43 billion, underscores the region's expanding economic output. Despite a slight decline in population from 3,330,458 in 2019 to 3,252,468 in 2023, the GRP per capita saw a significant rise. Starting at \$73,346.92 in 2019, it climbed to \$94,915.87 by 2023, indicating enhanced economic productivity per individual. The most pronounced increase in GRP per capita occurred between 2021 and 2022, with a jump of \$8,457.15. Meanwhile, the total GRP consistently grew each year, with the largest surge of approximately \$27.81 billion occurring between 2021 and 2022. These trends suggest that San Diego County has been on a path of economic growth, driven by factors such as industry expansion, increased investment, and improvements in economic efficiency.

Year	Total GRP (USD)	Population	GRP per Capita (USD)
2019	244,278,846,457.50	3,330,458	73,346.92
2020	244,822,303,264.04	3,296,045	74,277.60
2021	268,873,550,391.04	3,274,954	82,099.95
2022	296,683,894,891.99	3,276,208	90,557.10
2023	308,710,843,090.86	3,252,468	94,915.87
